Few roads, if any, in this section have done the extensive advertising that has been done by the "Henderson Route," and from all reports, they are reaping the benefit that is sure to follow judicious advertising. Mr. L. J. Irwin, the general passenger agent, has done a great deal to make his road popular, and the enforced additional equipment and new heavy rail attest the success with which he is meeting.

A scientist says there is nothing like trees to keep the air pure. Its leaves take up carbonic acid. The volume of carbonic acid exhaled by a human being in twenty-four hours is estimated at 100 gallons. If a single tree were growing where a dozen or twenty men were sleeping, the purifying action of its leave would insure the air being kept fresh.

The Board of Prison Commissioners met Tuesday to pass upon regular monthly business. The Warden's report for July will show that the Frankfort penitentiary cleared \$1,774.13.

Hon. Chas. Sublett, of Salyersville, has been selected as the Democratic nominee for State Senator from the Wolfe district. The two contending nominees, Hons. J. J. Hampton, of Jackson, and A. Heward Stamper, of Campton, were both anxious for an amicable settlement of the matter.

When men put up their money to do a thing they must be credited with believing that it can be done and that it is a good thing. A joint committee from the Knights of Labor and the American Anti-Trust League have appropriated \$500 to hire two lawyers and pay other expenses of gathering of evidence, upon which the Attorney General will be asked to proceed against the steel trust for having violated the Sherman anti-trust law. They will also begin proceedings against the trust under several state anti-trust laws. Many are watching the movement with interest, although they regard it as doubtful whether anything substantial will be accomplished by it.

It is not difficult to understand how the war in South Africa has increased the price of horseflesh, not only in the United States but everywhere, when one talks with those who know. A British officer has recently said that in two states—Missouri and Kansas—his government had spent \$5,000 for horseflesh, and a gentleman from South Africa, now in Washington, says ship loads of horses had been steadily arriving at Capetown for a year or more before he left there and that an officer in a position to know had told him that 200,000 horses and mules had been used so far by the British in the Boer war. Quite a draft upon the world's supply, and made within the short space of two years.

The "Henderson Route" officials report very heavy travel via their line to Oklahoma, account opening of the new land.

Don't get gay with the editor, says an exchange. A young woman poked fun at the editor of

the Bluffton, (Ind.) Banner because his trousers were patched. The editor went home and sued her husband for \$10 he owed on subscription.

A Northmiddleson, man who eagerly searched his pocket for a chew of tobacco mistook a two-dollar bill for the tobacco until he decided that log green wasn't so good if it was so costly.

Near Rose Hill, in this county, there is said to be a negro who is 113 years old. His name is Nathan Bottom, and he says he is that old, but few negroes have any record of their birth and their ages usually are guess work. —Harrodsburg Democrat.

At Owingsville, Arthur McKee and Grover Phelps were grubbing bushes off a pasture when they came to a bank of dirt that had been thrown out of a pool. In digging in this bank one of them discovered several 50-cent pieces. They then dug through the pile of dirt and unearthed fourteen silver half dollars, the dates running from 1807 to 1836.

A Kentucky father took a son to Missouri where they married sisters and are now brothers-in-law. The father who is fifty-three married the younger sister who is but nineteen, while the son's bride who is twenty-four, is two years his senior.

While drunk and returning from the Madisonville fair, Dan Harris amused himself by firing his pistol promiscuously along the road. During his spree one of the balls from his pistol hit and killed a Miss Humphreys while standing in her yard which was on the road. Harris is now in jail on the charge of murder.

A conductor who runs into Fulton, recently collected on his train a ticket from Cincinnati to Fulton which had been sold on December 21, 1892. The old man who presented it for passage said that just after he bought it he had heard of a wreck on the road, and was afraid to get on the train. He never summoned up courage enough to use the ticket until last week.

To run a newspaper all a fellow has to do is to be able to write poems, discuss the tariff and money question, umpire a base ball game, report a wedding, saw wood, beat a lawyer, describe a fire so that the readers will shed their wraps, make a dollar do the work of ten, shine at a soiree, address horticultural societies, measure calico, abuse the liquor habit, test whisky, subscribe to charity, go without meals, attack free silver, defend bimetalism, sneer at snobbery, wear diamonds, invent advertisements, overlook scandal, praise babies, delight pumpkin raisers, minister to the afflicted, heal the disgruntled, fight to a finish, publish doctors' resolutions denouncing a lawyer, set type, mould opinions, sweep the office, speak at prayer meeting, stand in with everybody and everything, etc.—Ex.

According to the investigations of Messrs Ewell, Bigelow, and Page, chemists of the Department of Agriculture, so-called pure fruit, products are thickened with starch, sweetened with glucose and saccharin, preserved with salicylic acid, benzoic acid, and then artificially colored. They find that a favorite practice is the preparation of jam from the refuse pulp of jelly man-

ufacturers, while in one instance raspberry seeds were found in "currant jam." They claim that the demand for cheap goods is the chief cause for adulteration, and that in many cases the price asked for a glass of so-called jelly is scarcely more than the price of an empty glass and the sugar used in the production. In fact, unless one is willing to pay an old-fashioned price for old-fashioned preserves, jellies, and jams, adding in the price of the labor, with the cost of the other materials, he will continue to eat preparations of gelatin, sweetened with adulterated extracts, colored with chemical dyes, and a few stale fruit seeds mixed in to further the delusion.

Perfection is a word that cannot be applied to many products, but when it is used to identify Kerr's best flour. It expresses a truth.

WOMAN'S RELIEF

A really healthy woman has little pain or discomfort at the menstrual period. No woman needs to have any. Wine of Cardui will quickly relieve those smarting menstrual pains and the dragging head, back and side aches caused by falling of the womb and irregular menses.

WINE OF CARDUI

has brought permanent relief to 1,000,000 women who suffered every month. It makes the menstrual organs strong and healthy. It is the provision made by Nature to give women relief from the terrible aches and pains which blight so many homes.

GREENWOOD, LA., Oct. 14, 1900. I have been very sick for some time. I was taken with a severe pain in my side and could not get any relief until I tried a bottle of Wine of Cardui. Before I had taken all of it I was relieved. I feel it my duty to say that you have a wonderful medicine.

A YOUNG LADY'S LIFE SAVED.

At Panama, Columbia, by Chamberlain's Colic, Cholera and Diarrhea Remedy.

Dr. Chas. H. Utter, a prominent physician, of Panama, Columbia, in a recent letter states: "Last March I had as a patient a young lady sixteen years of age, who had a very bad attack of dysentery. Everything I prescribed for her proved ineffectual and she was growing worse every hour. Her parents were sure she would die. She had become so weak that she could not turn over in bed. What to do at this critical moment was a study for me, but I thought of Chamberlain's Colic, Cholera and Diarrhea Remedy and as a last resort prescribed it. The most wonderful was effected. Within eight hours she was feeling much better; inside of three days she was upon her feet and at the end of one week was entirely well." For sale by J. W. Dawson & Bro. and Morgan McKinney.

Whirlpool in Kentucky River.

Another wonder has just been discovered in upper Kentucky river in a short bend two miles above Boone's Knob, which after the completion of lock No. 9, will be pointed out to steamboat tourists by the crews of passing steamers. It has been named "The Bottomless Whirlpool," because so far nobody has been able to sink a line in it to ascertain just how deep it is. Its disc is about thirty feet and it is away from the foot of the gigantic cliff about ten feet, buzzing with the rapidity of a buzz-saw all the time except when the water in the river is too low for navigation. There have been instances where log rafts have drifted into this whirligig and been torn to pieces in a twinkling. The loosened logs would dance about in it for hours before being forced out of its clutches. The bottomless whirlpool is in an isolated place that happens never to have been observed by surveying parties who measured that part of Kentucky river, because they crossed the cliffs it is at the foot of and never passed it on the water surface. The big hole goes straight down through endless rock and is a wonder to look upon.—Harrodsburg Sayings.

Farmers ought to sow turnips, and lots of them. It is the right time for sowing and a good crop should be raised. They make good feed for milk cows. It would also be well enough to sow rye for fall and winter pasture, as it comes on very quick and makes excellent pasture for stock, especially colts and calves.—EX.

The Winchester Gateway Sentinel has proposed a plan to build a monument to Mrs. W. S. Taylor, the deceased wife of W. S. Taylor, through a half million subscriptions of 10 cents each.

The prettiest scenery this season of the year is that along the line of the popular "Henderson Route." Almost the entire distance from Louisville to Henderson you are in full view of the Ohio river, in addition to this the elegant ballasts of the road makes it desirable to the traveler as it is almost free from dust.

The Glasgow Times tells of a lucky farmer of that county who has not worried much over the drouth. His name Genie Baird, and he now has on hand 900 barrels of last year's corn, besides fifty hogsheads of fine Burley tobacco. He will raise as much of a crop this year as any other man in the county, and besides has his last year's crop on hand ready to sell at the high prices that will prevail this fall.
